[Nov-17-2001 CCD]

(RCVD 11/16/01)

Clay, I'm really having problems. Now it won't let me add new names. When I finish inputting the data and try to go on I get the message:

<The changes you requested to the table were not successful because they would create duplicate values in the index, primary key or relationship. Change the data in the field or fields that contain duplicate data, remove the index or redefine the index to permit duplicate entries and try again.>

There are other problems and I have a volunteer ready to combine the other data into this db. I don't dare turn it over to her because she will get more confused.

What's gone wrong?

Pat
